

## Grenada joins WIPO's international trademark system

The Government of **Grenada** has deposited its instrument of accession to the Madrid Protocol, the governing Treaty of the **Madrid System**, which now has **132 member countries** (in the following link we explain what the Madrid System is: [how to register and protect a trademark internationally](#)).

### Consequences of Grenada's accession to the Madrid System

- **Businesses and entrepreneurs in Grenada** who have registered– or applied for – a national trademark registration through Grenada's Corporate Affairs and Intellectual Property Office, can seek protection of their marks in all other 131 Madrid System members, by filing one international trademark application, in one language (English) and paying a single set of fees, in one currency.
- **Trademark holders in other Madrid System members** will be able to designate Grenada in their international trademark applications.
- **Existing international trademark registration holders** can expand protection to include Grenada.

This addition will be effective as of **March 15, 2026**.

At **UNGRIA**, we advise and assist our clients in designing **international trademark protection strategies**. Please, do not hesitate to contact us if you are considering internationalizing your trademark or expanding the protection of your current portfolio.
